Week 2 Assignment: Update and Style Your Personal Resume or CV in HTML

Objective:

Update your **Personal Resume or CV webpage** by incorporating **advanced HTML elements** (such as **tables**, **text formatting**, etc.) and apply an **external CSS stylesheet** to enhance its appearance.

Instructions for Week 2:

1. **Update Your HTML Structure**:

   ○ **Tables**: Add a **table** to display your **work experience** or **education** in a clear, tabular format.

      ▪ Use the <table>, <th>, <tr>, and <td> elements to structure the information.

   ○ **Text Formatting**: Apply HTML formatting elements like:

      ▪ <strong> for strong emphasis (e.g., for job titles).

      ▪ <em> for emphasized text (e.g., for skills or certifications).

      ▪ <del> for deleted text (if applicable).

   ○ **Semantic HTML**: Ensure your resume is well-organized using semantic HTML tags:

      ▪ Use <header>, <section>, <footer>, <article>, and other appropriate elements.

2. **Apply External CSS**:

   ○ **Create an External CSS File** (styles.css) and link it to your HTML file (resume.html).

   ○ Use **External CSS** to style the webpage, applying rules to:

      ▪ Text (e.g., font size, color, line height).

      ▪ Backgrounds (e.g., set a color or image as the background).

      ▪ Layout (e.g., apply margins, padding, borders, or use **flexbox** to align sections).

      ▪ Add **hover effects** for interactive elements like links or buttons.

3. **New Sections and Styling**:

   ○ Use **advanced HTML elements** such as <table>, <ol>, <ul>, and <a> to display your information in a structured and attractive manner.

Submission:

1. Submit both the resume.html and styles.css files to your **GitHub repository** and **Google Classroom** assignment.
